(303) 808-3979 | Boulder, CO

I am a proficient, agile full-stack Ruby on Rails developer who is excited to learn new languages and technologies. I place high value on writing clean, test-driven code. I work well on teams and enjoy pair-programming.

gSchool Group Project: Social Network

<https://github.com/gSchool/g2-social-network>

Modeled after Facebook, I rotated into a four-person team to contribute to the building of a social network. **Ruby, Rails, relational PostgreSQL databases, full RSpec test coverage, user authentication, HTML, basic SCSS.**

Personal Side Project: Growlers to Go

https://github.com/pwenig/growlers_to_go

Developed an idea and application for a subscription-based brewery delivery service that delivers growlers of beer directly to people's homes.

Ruby, Rails, PostgreSQL database, full RSpec test coverage, user authentication.

Ruby Exercism.io Exercises

<https://github.com/pwenig/exercism-exercises/tree/master/ruby>

A variety of Ruby logic problems designed to strengthen simple, expressive, readable code writing skills.

Owner, The Bar Method, Small Business, 2009-2013

Started, built, and successfully exited a two-location exercise business. Raised capital, hired and trained staff, developed and executed new member marketing strategies.

Vice President Sales & Marketing, Consumer Electronic Start-Ups, 2002-2009

Spearheaded sales and marketing for two industry-first consumer electronic products. Exceeded sales targets.

Director, Partner Marketing, AOL, 1999-2002

Recruited to launch new customer acquisition, retail channel initiative.

gSchool, Boulder, CO March 2014 - Aug 2014

Full stack Ruby on Rails. Led by Pivotal Labs senior engineers, gSchool is a full-time, six-month intensive technical education of agile web development practices.

Pair programming, test driven development and continuous integration.

Ruby, Rails, Sinatra, RSpec, Capybara, PostgreSQL, HTML, CSS, Git, Pivotal Tracker.

DaVinici Institute, Louisville, CO Sept 2013 - Dec 2013

Ruby on Rails A part-time introduction to Ruby on Rails which provided a solid framework to continue learning upon.

Ruby, Rails, Sinatra, PostgreSQL HTML, CSS, Git.
